

# An error at library preparation step

I use flux-simulator-1.2.2-20140614022955, since in this version you have fixed the problem with the short length transcripts (<3 nt).

Now the program crashes at library preparation step

```
[LIBRARY] Reverse Transcription  
[LIBRARY] Configuration  
Mode: RH  
PWM: default  
RT MIN: 500  
RT MAX: 5500
```

```
Processing Fragments * FAILED  
[ERROR] Error while fragmenting : null  
java.lang.NullPointerException  
at barna.flux.simulator.fragmentation.Fragmenter.toCDF(Fragmenter.java:788)  
at barna.flux.simulator.fragmentation.FragmentReverseTranscription.process(FragmentReverseTranscription.java:226)  
at barna.flux.simulator.fragmentation.Fragmenter.process(Fragmenter.java:596)  
at barna.flux.simulator.fragmentation.Fragmenter.call(Fragmenter.java:222)

at barna.flux.simulator.SimulationPipeline.call(SimulationPipeline.java:54)  
at barna.commons.launcher.Flux.main(Flux.java:197)
```

Could you please help?

Gleb
