

Appendix D - Forum

The Forum is for discussing concepts, input and output of the AStalavista program. Issues or requests for enhancements can be linked to the discussions but should be reported in the [Issue Tracker](#) rather than in a Discussion. As a rule of thumb, any topic that requires a revision of the codebase should be reported as an issue.

Discussions can be read anonymously, but [creating a new topic](#) or commenting in an existing thread requires the user to [sign up](#) and [log into](#) the wiki system. [Contact the site administrators](#) if there are problems during registration or posting a topic.

To post your comments, go to the most appropriate section below and press the "New Topic" button next to the search bar at the top of the page.
