

# 1.1 Release Notes

## Resolved Issues

| T                                                                                 | Key       | Summary                                                                                                                                         | Status   |
|-----------------------------------------------------------------------------------|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------|----------|
|  | BARNA-206 | Duplicated reads have no unique ids                                                                                                             | RESOLVED |
|  | BARNA-203 | Write documentation to make sure that its clear where /1 /2 comes from                                                                          | RESOLVED |
|  | BARNA-196 | Error: SIZE_DISTRIBUTION with N(mean, sd) won't work. It just doesn't.                                                                          | RESOLVED |
|  | BARNA-195 | TSS_MEAN still gives error                                                                                                                      | RESOLVED |
|  | BARNA-187 | Make mated Flux Simulator IDs equal                                                                                                             | RESOLVED |
|  | BARNA-156 | Enzymatic Fragmentation produces invalid fragments (start>end)                                                                                  | RESOLVED |
|  | BARNA-92  | in FragmentDB.createIndex() branch if (entry == null) return new FragmentIterable(-1); triggers a NullPointer in Constructor FragmentIterable() | RESOLVED |
|  | BARNA-68  | Refactor FluxSimulatorSettings.RelativePathParser to a more general class outside of the Simulator settings                                     | RESOLVED |
|  | BARNA-52  | weight matrices deal with "N" read from chromosome sequence                                                                                     | RESOLVED |
