Running time

Hi everyone,

I've been running the flux simulator to generate 20M reads, 100bp, paired-end. The total running time is rather big,

[END] I finished, took me 37099 sec.

That'd be ok with me, but I've notice that most of the running time (~90%) is spent on the Sequencing step, and was wondering if this is expected.

thanks

David
